

APPSUITE: UPDATE 2.0

Swipe left to find out what's new!

SWIPE LEFT

HOME SCREEN **NEW**

A new level has been added to the standard home screen. Tap on the main buttons to get to AppSuite's main areas.

START DEMO ①

Start a newly integrated demo project which presents the core features of AppSuite.

BROWSE APPS ②

Browse all installed apps and widgets.

HELP / SUPPORT ③

Opens a PDF widget with a brief documentation about AppSuite.

DEMO PROJECT **NEW**

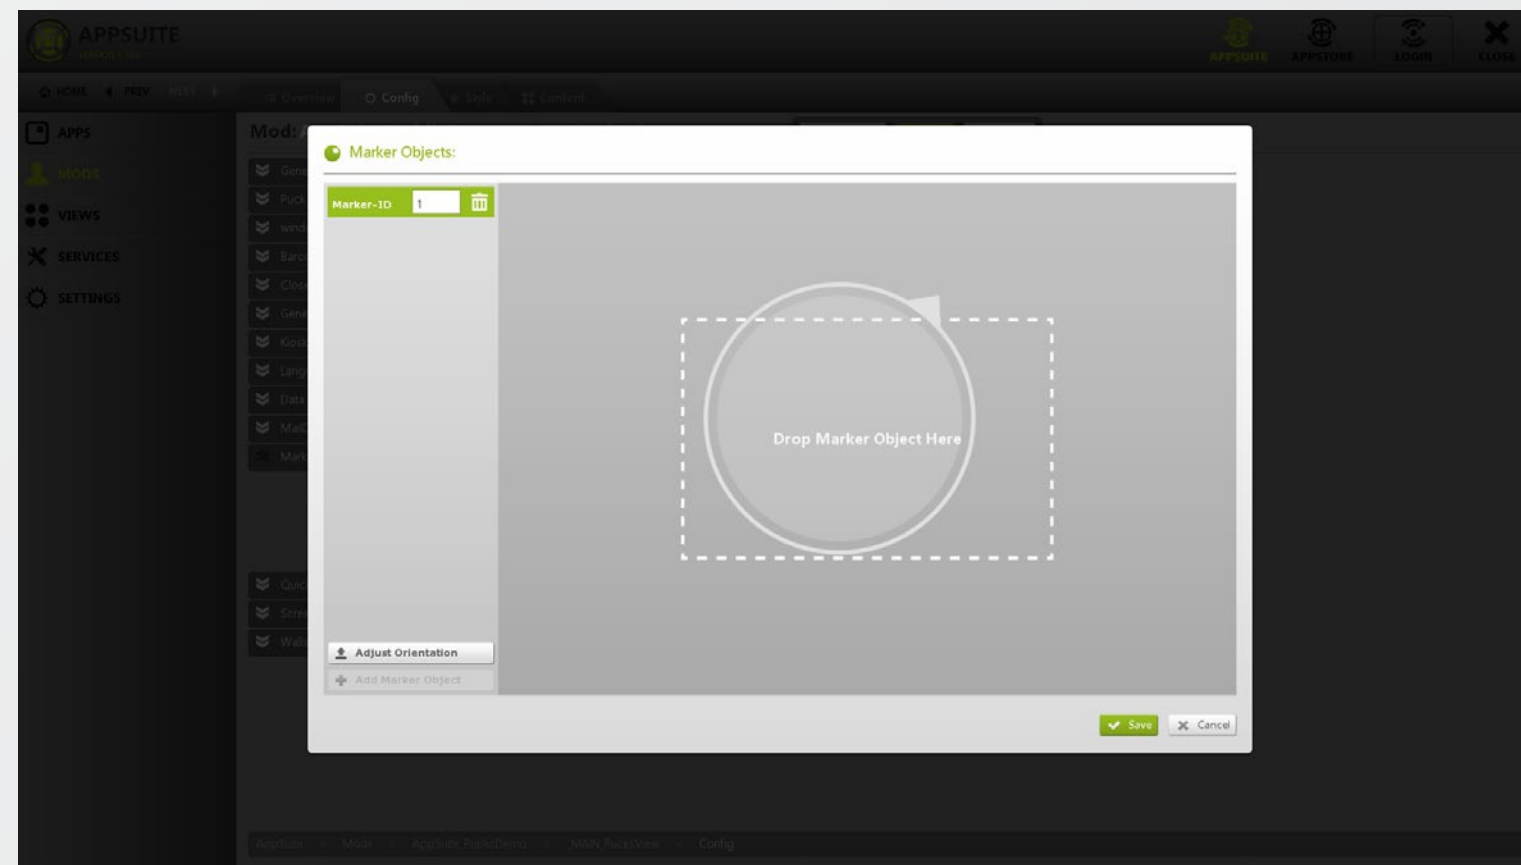

A newly integrated and pre-installed demo project presents AppSuite's main features.

To start the demo project, tap on the respective button on the initial level of home screen or activate the demo project as main view in the views section.

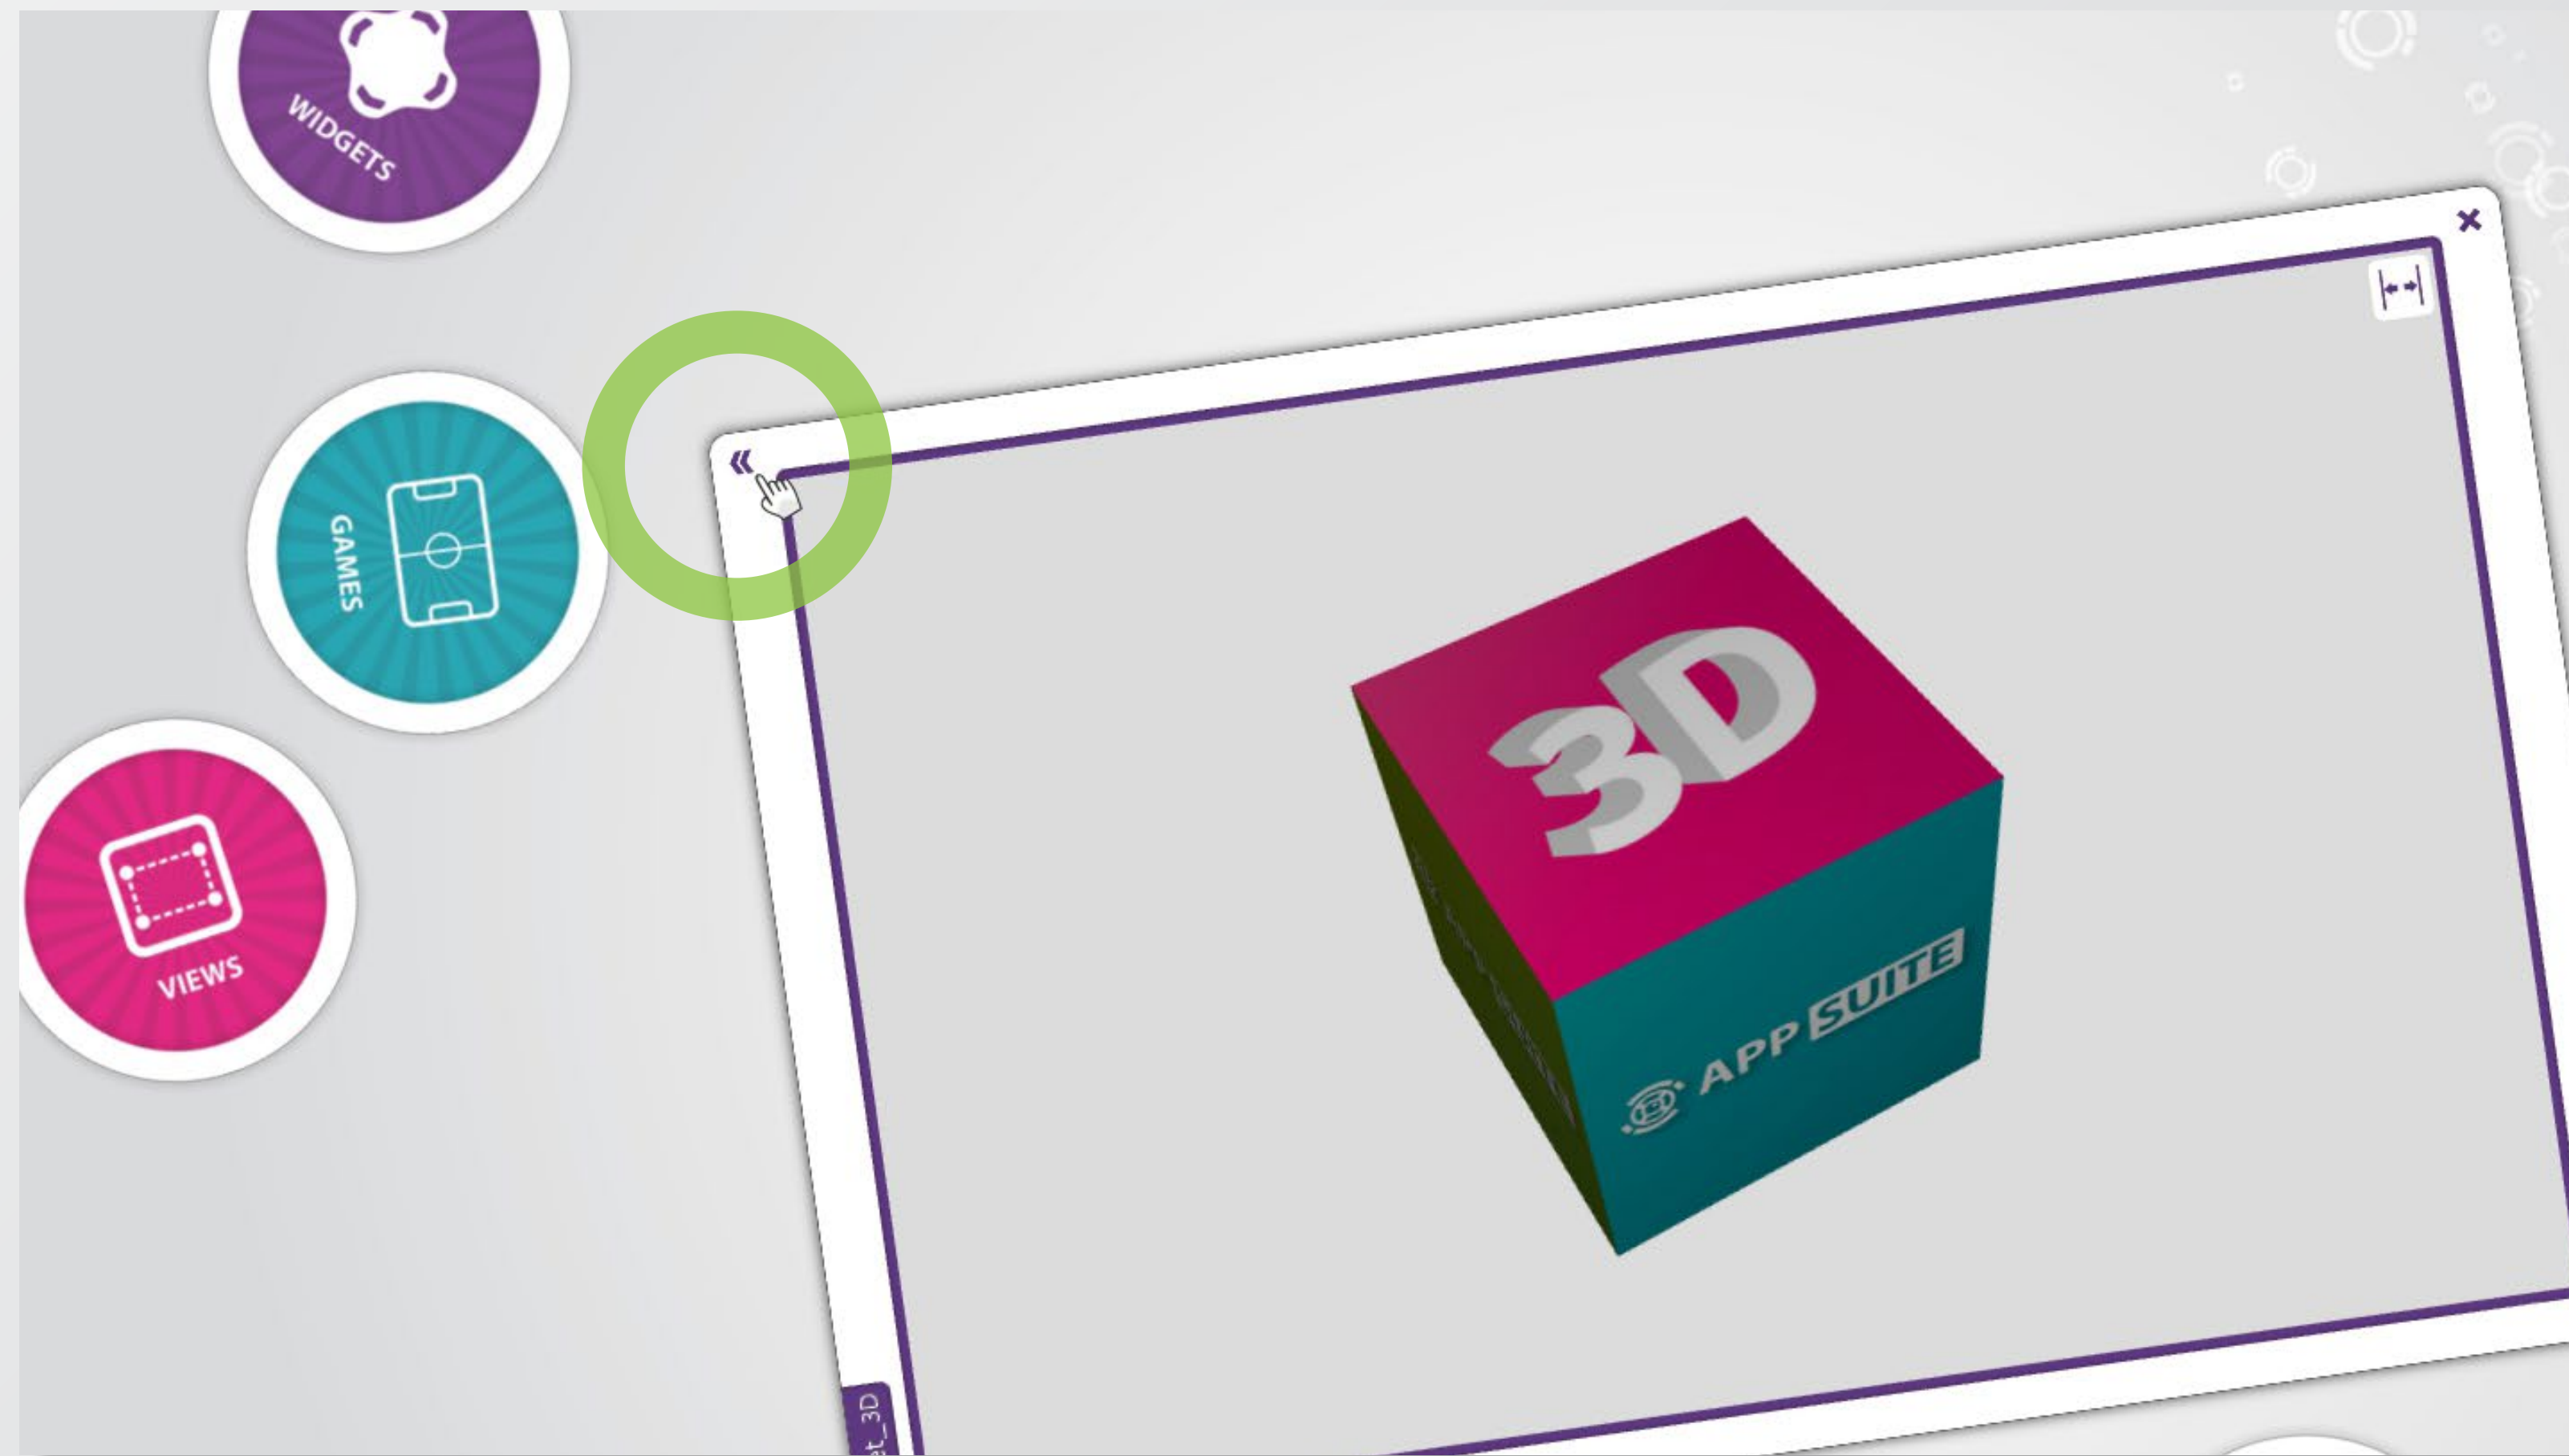

OBJECT RECOGNITION FOR LCD TOUCHSCREENS **NEW**

AppSuite now supports object recognition for all LCD-based touchscreens.

To access the object recognition wizard, go to the config of a view mod.

NESTING WITHIN VIEWS NEW

Views opened in windows can now nest further views within the existing window.

Therefore, a new toolbar opens with a button to get back to previous levels.

VIEW APP: AREA VIEW NEW

Simple design, extremely versatile: layer several click areas on an individual background. These serve as buttons, which will start the desired apps and widgets at a touch. That way you can create various start menus for apps and widgets.

Each button can have an individual graphic and shape and you can position & configure it with miscellaneous parameters.

PRESENTATION APP: WHITEBOARD NEW

The screenshot displays a whiteboard application interface. At the top left, there is a toolbar with various drawing tools like pens, eraser, and selection tools. The main area shows a presentation slide with two sections, 'Headline A' and 'Headline B', each containing placeholder text and graphics. Handwritten annotations in orange and blue ink are present: 'Composing + Marketing' on the left, 'Description' on the right with an arrow pointing to a graphic, and 'Analysis Facts' at the bottom right. A red box on the bottom left contains the text 'next Meeting 13:00'. The slide content includes 'Your Slogan!', 'Your Company', 'Your Motivation!', 'Headline A', 'Headline B', and 'Your Image', 'Your Ambitions', 'Your Slogan', 'Your Products'.

Transform your next team meeting into an interactive multimedia experience with this smart multiuser whiteboard software for all larger touchscreens: Open various photos, graphics, PDF pages or video frames and tag them with remarks, symbols and annotations.

The results are tagged and annotated collage images, which can be exported and forwarded for further review. For faster results and smarter decision making in discussions, team meetings and workshops.
