New users are now guided through AppSuite's most important functions by a so-called *Onboarding* system.

The current status is visualized on the new home screen, additional emails explain the next steps.

HOME SCREEN UPDATE

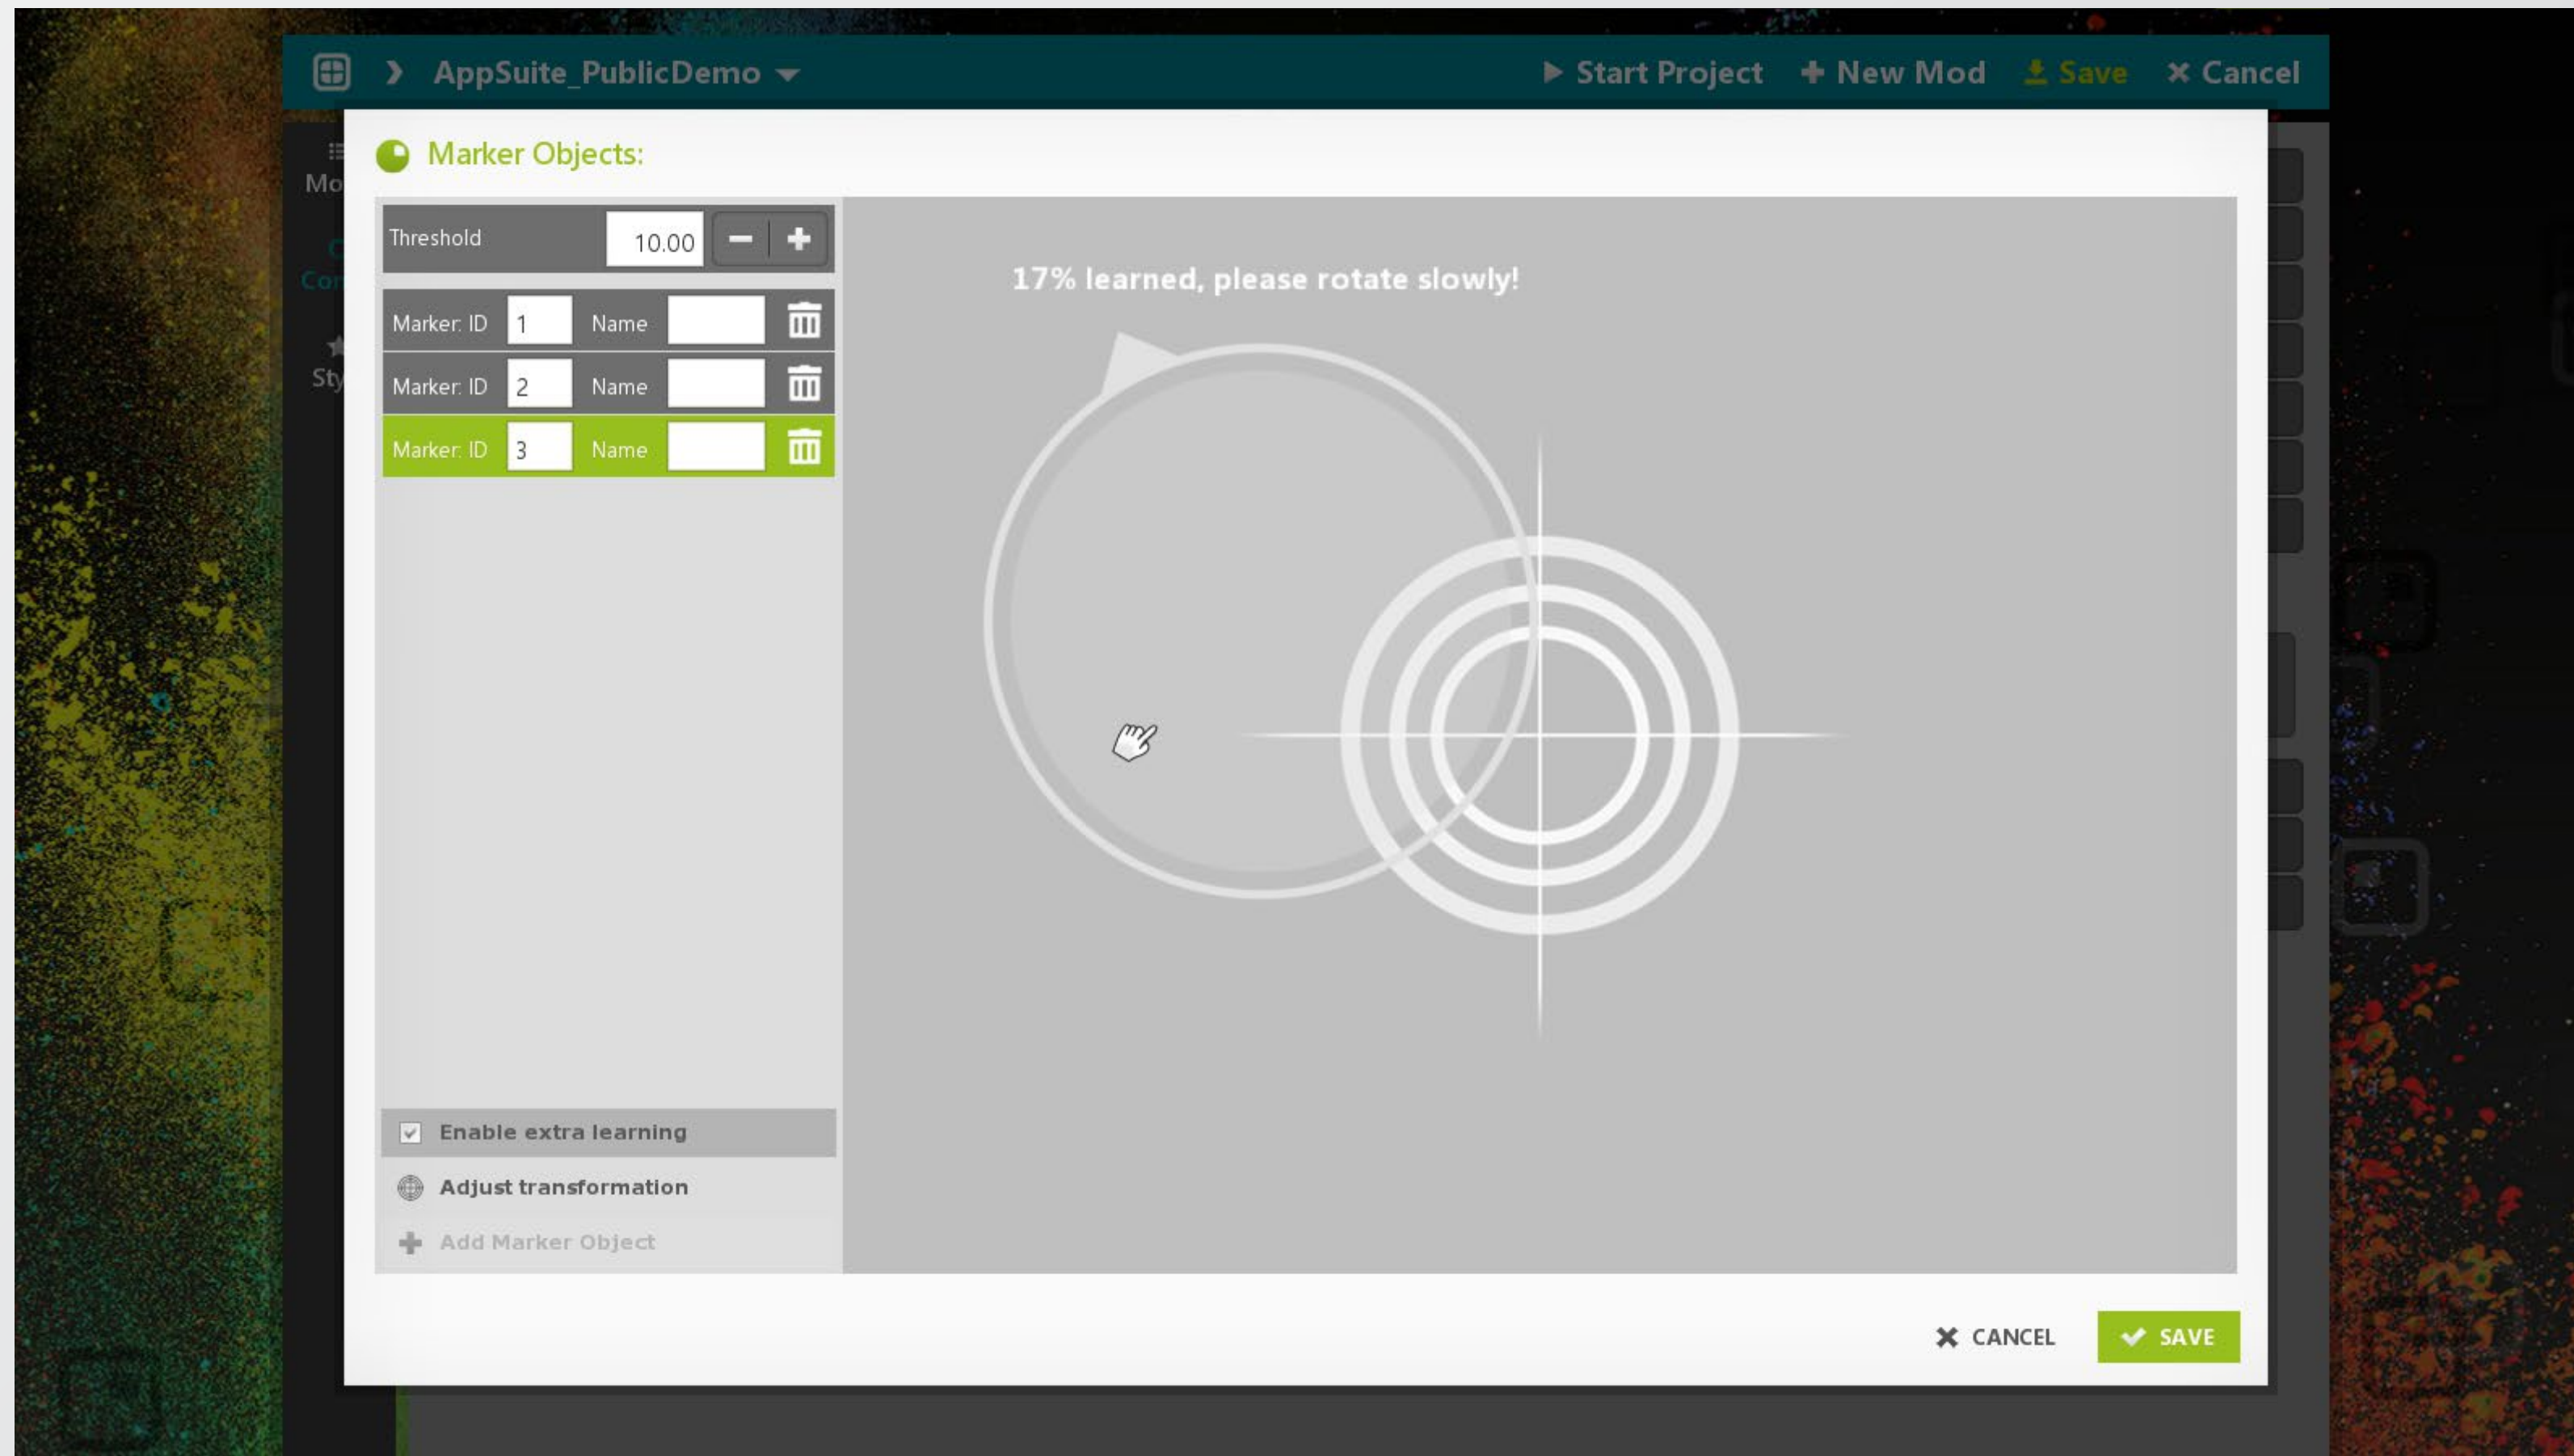

The initial home screen has been completely redesigned and serves now as your central dashboard.

On several tiles you'll find the most important information and links to projects, apps, the help center and the new onboarding system.

OBJECT RECOGNITION UPDATE

The algorithm for the recognition of objects by means of finger patterns has been completely revised to function more accurately and precisely.
