

MULTITOUCH MODULE-SYSTEM

ΩMEGA

INTERACTIVE **MULTITOUCH DISPLAYS** IN SPECTACULAR SIZES AND SHAPES

-  UNLIMITED MULTITOUCH
-  FLEXIBLE COMBINATIONS
-  EASY INTEGRATION
-  SEAMLESS XXXL-DISPLAYS
-  HORIZONTAL & VERTICAL

Combine eyefactive's® MULTITOUCH-modules like puzzle pieces and create displays in spectacular sizes and shapes – long, broad, round, horizontal or vertical... eyefactive's module-system is designed to be easily integrated into existing concepts and architecture. Fascinate your customers, visitors or employees with an extraordinary multimedia experience.

FLEXIBLE COMBINATIONS Combine single modules and create individually shaped displays – for instance for large-sized interactive counters or walls.

EASY INTEGRATION Modules can be easily integrated in any existing architecture. Standard cases and projection surfaces can be delivered upon request.

TRUE MULTITOUCH The interactive display runs with true MULTITOUCH. Due to our in-house developed EVOVIS tracking-engine the number of touch-points, movements and markers is effectively unlimited.

SEAMLESS DISPLAY Due to Edge-Blending technology, edges between single modules disappear and guarantee seamless displays in any dimension.

MASTER/SLAVE MODULE-SYSTEM Each module is equipped with a tracking PC, which supplies a master PC with user interactions. The master PC simultaneously shows the installed apps on the seamless display.

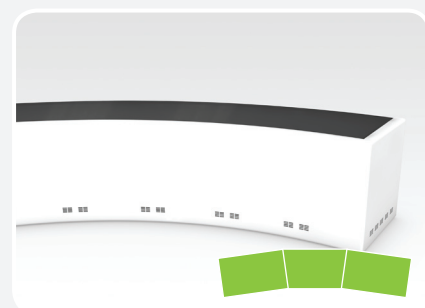

TECHNICAL SPECS: MODULE

MULTITOUCH-Tracking	Unlimited user input
Marker-Tracking	Standard: 510, expandable to 65.534
Display	47" LCD-Rearprojection, (~1,2m diagonal)
